

Super Hornet Block II

TOMORROW'S CAPABILITY IS ALREADY ON BOARD.

The new F/A-18E/F Super Hornet Block II affordably delivers tomorrow's capability to the U.S. Navy today. This next generation strike fighter brings together the world's most advanced radar, sensor integration, and smart weapon systems along with increased payload, stealth and range. Uniquely flexible and survivable, the Super Hornet will be the backbone of the fleet for decades to come.
